EDUCATION

09/2023 – Present, Eindhoven

FONTYS UNIVERSITY OF APPLIED SCIENCES

- Focus: Software Engineering & Artificial Intelligence

06/2025, Brno

MENDEL UNIVERSITY – BIP: MASTERING THE FUTURE (AI PROGRAM)

- Courses: Data Mining, Fuzzy Systems, Computer Vision, AI Fundamentals

SKILLS

- Programming: Python, Java, C#, JavaScript
- Frameworks: Spring Boot, React, Vite, Razor Pages
- AI/ML: Data Analysis, Classification/Regression Models, Scikit-Learn, Clustering, TF-IDF, fuzzy matching, Snowflake
- Tools: Docker, Git, GitLab CI/CD, Flyway, Ollama, OpenClaw, n8n
- Practices: Clean Architecture, OOP, Unit & Integration Testing, E2E Testing

CERTIFICATES

- IELTS (B2)
- Fontys Propaedeutic Certificate
- ITF Taekwon-do – 1st Dan Black Belt

LANGUAGES

- English (Professional)
- Ukrainian (Native)
- Russian (Native)

PROFILE SUMMARY

Junior Software Engineer & ML Intern with hands-on experience in Python, Java/Spring Boot, and React. Currently completing a data science internship at DAF Trucks NV, building a behavioral customer segmentation pipeline – including data deduplication, feature engineering, and Clustering. Previously built full-stack applications using clean architecture, CI/CD, and Docker. Passionate about practical AI implementation and building systems that work in production.

EXPERIENCE

DAF Trucks NV — Data Science / ML Intern

02/2025 – PRESENT

- Behavioral customer segmentation on 226K+ vehicle records
- Built deduplication pipeline using TF-IDF, cosine similarity, graph-based canonical mapping
- K-Means clustering with preprocessing pipeline (StandardScaler, OHE, OrdinalEncoder)

PROJECTS

Habit Tracker (Java + Spring Boot, React)

09/2025 – 01/2026

- Built backend using Clean Architecture: controllers → services (use cases) → repositories.
- Implemented component & integration testing, Flyway migrations, API documentation.
- Developed frontend in React (Vite), axios API integration, and E2E testing with Cypress.
- Tech: Java, Spring Boot, JPA, Flyway, Docker, React, Vite, Cypress

Student Stress Classification (Python, ML)

02/2025 – 06/2025

- Designed and collected a custom dataset via survey based on psychologist input.
- Performed data preprocessing, EDA, feature engineering, and model selection.
- Delivered a predictive ML model for a real client.
- Tech: Python, Pandas, NumPy, Scikit-Learn, Matplotlib

Office Reservation System (Driessen, Group Project)

09/2024 – 12/2024

- Developed features based on a real client's requirements.
- Coordinated team workflow as SCRUM master.
- Tech: Java, React

Student Guide Application (C#, SQL, Razor Pages)

03/2024 – 06/2024

- Created Windows Forms app + Razor Pages website sharing one database.
- Built an OOP-based recommendation system.
- Tech: C#, Razor Pages, WinForms, SQL Server
